12-core single-mode unarmored optical cable

Overview

These cables consist of 12 to 216 fibers organized into 12-fiber ribbons inside a central tube. Dielectric strength members provide tensile strength while a specially formulated flame-retardant outer jacket allows the design to meet the requirements of the NFPA 262 flame test. Corning FREEDM® One riser cables are flame-retardant, UV-resistant, indoor/outdoor cables designed for aerial and duct applications with no need for a transition splice when entering the building. Optical Specifications (12 Core Single Mode) 2. Optical Fibers are placed inside filled buffer tubes containing gel and containing up to 12 optical Fibers. The loose tube design offers reliable transmission performance over a broad temperature.
