400G PoE Switch from a Philippine Manufacturer

Overview

Teleeye supplies and installs PoE, managed, and unmanaged network switches for offices and enterprises in the Philippines. Request a quote today.

Key Takeaways

Currently, there are no publicly listed 400G PoE switches manufactured in the Philippines, but local suppliers and distributors offer high-capacity PoE switches from international brands. Local Suppliers and ManufacturersIT Warehouse Philippines Offers a wide range of managed and unmanaged PoE switches suitable for ISPs, enterprises, and SMBs. While they carry high-capacity PoE switches, there is no specific listing for 400G PoE switches manufactured locally.

Asianic Distributors Inc. Provides various PoE and Gigabit switches, including models with multiple PoE ports and extended power capabilities. Their offerings focus on 10/100/1000 Mbps and some 16-port PoE switches, but 400G PoE switches are not listed.

ME

C Networks Corporation A Philippine-based manufacturer specializing in high-performance switching and routing solutions for Cloud, Mobile, and IoT applications. They provide advanced Layer 2/3 switches, but current public information does not indicate a 400G PoE model.

Alternative Approaches

International Brands Available Locally: Brands like Ubiquiti Networks offer 400W PoE switches (e.g., USW Pro 24 PoE) with Layer 3 management and multiple PoE++ ports. These can be purchased through local distributors such as XBS Asia. Custom Solutions: For enterprise networks requiring 400G throughput, consider modular chassis switches from global manufacturers, which can be integrated locally with PoE modules.

Recommendations

Contact ME

C Networks Corporation or IT Warehouse directly to inquire about custom or upcoming high-capacity PoE switches. If 400G PoE is critical, consider importing from international suppliers while leveraging local distributors for support and warranty. Evaluate your network requirements: number of PoE ports, total wattage, Layer 2/3 features, and uplink speeds to ensure compatibility with existing infrastructure.

In summary, while Philippine manufacturers currently do not list 400G PoE switches, local distributors provide access to high-capacity PoE solutions from international brands, and custom solutions may be available through direct consultation with local manufacturers.
