400G Standalone Switch for Edge Computing

Overview

The IntellaView 400G EdgeSwitch performs aggregation, filtering, tunneling, Load Balancing, and more for high-demand AI applications and edge computing. IT teams that run distributed data centers can use the IntellaView 400G EdgeSwitch to reduce resources needed to gain visibility at the edge, increase efficiency, and. Hyperscale datacenter networks are under continuous pressure to provide massive scale and capacity. Edgecore contributed to the Open Compute Project. From 1G management switches to high-speed 10G, 25G, 100G, 400G, and 800G leaf-and-spine configurations, Edgecore meets diverse requirements for data centers, enterprises, retail environments, and high-performance computing. Data center switches powered by Broadcom's Tomahawk 6 chipset, delivering. Our Cisco N9000 Series Switches portfolio offers distributed modular, centralized modular, and fixed switches including super spine, spine, leaf, and border leaf. Powered by the Tomahawk 3 chip, Powered by the Tomahawk 4 chip, Powered by the Tomahawk 4 chip, Powered by the Tomahawk 4 chip, Refer to the comparison.

Article Content

400G network aggregation for AI, core or edge computing | APCON

The IntellaView 400G EdgeSwitch performs aggregation, filtering, tunneling, Load Balancing, and more for high-demand AI applications and edge computing.

400G Cloud Data Center switch

Discover Edgecore''s industry-first 400G open design switches contributed to OCP. Built for hyperscale data centers, these 400G Ethernet solutions deliver massive scale, low latency, and exceptional

Cloud Data Centers

From 1G management switches to high-speed 10G, 25G, 100G, 400G, and 800G leaf-and-spine configurations, Edgecore meets diverse requirements for data centers, enterprises, retail

Cisco 400G Data Center Networking

Transform your data center networking infrastructure with high-density 400G Cisco switches scalable to 800G. Optimized for simplicity and sustainability.

APCON IntellaView 400G EdgeSwitch | Network

The new IntellaView 400G EdgeSwitch is a powerful but small form-factor switch that is ideal for deploying in conjunction with either leaf or spine switches in large

How to Choose a Next-Gen 400/800G Switch for AI Data Center

This article explains the 400G/800G switch market trends and key factors to consider — such as chip type, port configuration, bandwidth, and application scenarios — to help you choose the

Edgecore Networks AS9716-32D 400G Open Networking Switch

This switch incorporates standard features typically found in Top of Rack / Leaf / Spine switches, such as redundant field-replaceable power supplies and fan units, and it allows for flexible airflow direction

400G Solutions

For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive

SONiC 32-Port 400G Data Center Switch Low Latency For AI/ML

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

Our 400G platforms are fully programmable and well-suited for collapsed-core architectures. Let''s arrange a technical discussion to explore your specific requirements and potential integration with

FS N9550-32D 400G Switch Enables AI and HPC Clusters with 400G

Equipped with built-in RoCEv2 capabilities, the 400G switch offers advanced features such as PFC, ECN, and dynamic load balancing, enabling low-latency, lossless communication for RDMA-based

Edgecore Networks Unveils a High-density 400G Switch for Next ...

Edgecore Networks, the leader in open networking solutions, today announces the release of a new 400G cloud data center switch to expand its 400G product portfolio. The DCS240 is

Edgecore Unveils a High-density 400G Switch for Next-Generation ...

Edgecore Networks, the leader in open networking solutions, today announces the release of a new 400G cloud data center switch to expand its 400G product portfolio. The DCS240 is a high

[Edgecore Networks] 400G product lineup

400G Ethernet is a key technology for evolving infrastructure to support the proliferation of mobile and cloud-based applications. Edgecore contributed to the Open Computing Project (OCP) design of the

Edgecore Networks Announces Optimized 400G Spine Switch for

Edgecore''s DCS511 32-port Tomahawk4 switch offers a cost-effective solution for lower-capacity data centers seeking 400G options, providing an alternative to 32x400G Tomahawk3 Spine

Edgecore Networks Intros Ultra High-Capacity 400G Switch for Data ...

Edgecore Networks announced the launch of the DCS520 - an ultra-high capacity 400G switch, designed to meet the demands of next-generation data center and cloud computing

Edgecore Introduces the Ultra High-Capacity 400G Switch to Build

Edgecore announced the launch of the DCS520 - an ultra-high capacity 400G switch, designed to meet the demands of next-generation data center and cloud computing environments

Edgecore''s DCS511 is a 400G-optimized open network data center

The DCS511 from Edgecore Networks is a 400G-optimized open network data center spine switch for data centers, service providers, and cloud operators.
