48-core data center terminal box

Overview

The HTB8048 Fiber Optic Terminal Box is a versatile, high-capacity termination solution for FTTx applications, offering secure fiber splicing, distribution, and cable management. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. Built with an IP65-rated enclosure, this terminal box is designed to withstand harsh environments, making it suitable. Fiberhome Rack-mounted Optical Fiber Terminal Box is a high-capacity 24-port, 48-core LC dual-linked single-mode terminal box designed for efficient fiber optic cable termination and management. Various types suited for particular applications exist. IEC/TIA/EIA compliant, RoHS certified solution for efficient network deployments.
