Adding an extra router to fiber broadband

Overview

Yes, you can connect two routers to one fiber modem, but understanding the 'how' and 'why' is crucial for optimal network performance. Do you need to add more computers or devices to your network but have no available ports?

Adding a second router is a great way to expand your network capacity, as well as the reach of your wireless signal in weak or "blackout" areas. We'll guide you through the simplest, most straightforward way. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX. This guide clarifies the possibilities, practical methods, and potential pitfalls, ensuring you maximize your home or small office network. Some ISPs offer Voice over Internet Protocol (VoIP) telephone service along with broadband.
