Albania Direct Sales of 40G Optical Core Router

Overview

40G QSFP+ Transceiver Modules | Optical Transceivers FS 40G QSFP+ optical transceiver module solutions offer a full range of QSFP+ modules from 150m to 80k.

Key Takeaways

40G optical networking equipment, including QSFP+ modules and compatible routers, is available in Albania through distributors and service providers like Albamedia, ATU, and online platforms offering Dell EMC and Cisco modules.

Local Distributors and Suppliers

Albamedia Shpk distributes advanced networking products, including routers and gateways suitable for high-speed connections. They provide solutions for ISPs and enterprises, ensuring compatibility with high-performance 40G networks.

AT

U (Albanian Telecommunications Union) offers a robust fiber optic network with DWDM transmission technology and Direct Internet Access (DIA) services. They support point-to-point transparent connections and allow service providers to lease capacity, which can complement 40G optical core router deployments. 40G Optical Modules AvailableDell EMC Compatible QSFP+ 40GBASE-ER4 Modules: These transceivers support 40 Gbit/sec line speed over single-mode fiber up to 40 km, with LC connectors and digital optical monitoring (DOM).

They are fully compatible with Dell EMC equipment and suitable for long-distance optical links. Cisco 40GBASE QSFP Modules: Cisco offers a range of QSFP modules for 40G Ethernet, including SR4 and SR4-S variants for multimode fiber, supporting high-density, low-power connectivity for data centers and enterprise core networks.

Online Purchase Options

Platforms like Desertcart Albania provide access to Dell EMC-compatible 40G QSFP+ modules, allowing direct purchase and delivery within Albania. Local electronics retailers, such as Electron Albania, offer networking equipment, though primarily for smaller-scale routers and Wi-Fi solutions.

Deployment Considerations

Ensure compatibility between the 40G optical core router and QSFP+ modules (Dell EMC or Cisco). For long-distance links, single-mode fiber with ER4 modules is recommended, while multimode fiber is suitable for shorter data center connections. Partnering with ATU or similar providers can simplify infrastructure deployment, offering leased capacity and point-to-point connectivity without the need for full network construction.

By combining local distributors, online module suppliers, and fiber network services, enterprises and ISPs in Albania can acquire and deploy 40G optical core routers effectively.
