Are fiber optic and network cable switch panels the same

Overview

While a patch panel helps with cables, a switch helps with data. They make management and changes easy. Here's the short version of it: Patch panels are passive devices that are used to organize network cables. If you're a new (or aspiring) network technician, though, you'll likely need more context than that. Let's unpack the. Patch Panel vs Switch: What's the Key Difference in Network Roles?
