Are there any accessories for the mesh cable tray

Overview

Mesh Cable Trays | PohlCon – Partner from start to future.Mesh Cable Tray Accessories Mesh cable trays are ideal for the flexible and safe routing of cable.

Key Takeaways

Mesh cable trays come with a variety of accessories including connectors, dropouts, hanging clips, covers, and cable management products to ensure secure, organized, and flexible cable routing.

Common Accessories

Connectors and CouplersClamp connectors join two trays in a straight line or after bends, allowing continuous cable routing without gaps. Tee, elbow, and cross fittings enable changes in direction, slopes, or branching of cable paths.

Dropouts and Cable Protectors

Plastic or metal dropouts relieve stress on cables as they exit the tray, preventing damage and maintaining cable integrity. Cord covers and cable protectors help organize messy cables, reduce tripping hazards, and provide additional protection.

Hanging and Support Accessories

Hanging clips attach to the sides of trays to suspend them from threaded rods, supporting the tray's weight and maintaining alignment. Mounting brackets and supports secure trays to walls, ceilings, or other structures, ensuring stability and proper load distribution.

Covers and Safety Accessories

Tray covers protect cables from dust, debris, or accidental contact while maintaining ventilation. Wire management products such as ties or straps keep cables organized within the tray.

Customization Tools

Mesh trays can be cut, bent, or formed on-site, and accessories like connectors and dropouts facilitate these adjustments without compromising cable safety.

Benefits of Accessories

These accessories enhance installation speed, cable organization, ventilation, and safety, while reducing labor costs and fire risk due to proper airflow around cables. They also allow for on-site customization, making mesh cable trays adaptable to changing layouts or additional equipment. In summary, mesh cable tray accessories provide the flexibility, protection, and support needed for efficient and safe cable management in industrial, commercial, and IT environments.
