Automatic Assembly Line for Optical Modules

Overview

Our automated line is a turnkey solution capable of handling a wide range of product types, including AMOLED, PMOLED, TFT, and STN displays. With a production rhythm of ≤3. 7 inches to 7 inches, this line is optimized for high-volume. ASSEMBLYLINE systems are high-precision stand-alone and in-line assembly machine solutions designed for fully-automated production (align-&-attach) of photonic devices. They uniquely combine fast-active optical alignment capability and flexible attachment configurations with a tried and tested. ficonTEC launches next-generation optical circuit switching and the ai era ficonTEC launches DLT-D1, a multi-site die-level tester for double-sided compact 3D CPO optical engines SENKO, BizLink and ficonTEC partner at SEMICON Taiwan 2025 VLC Photonics and ficonTEC Showcase Advanced Automated. For the particularly precise assembly of optical and electronic components, we develop plant prototypes and modular systems with Industry 4. Integrate active alignment into assembly processes to minimize scrap and rework costs. 7″ to 7″ displays, this line features nanometer-level precision, static.

Article Content

ASSEMBLYLINE

ASSEMBLYLINE systems are high-precision stand-alone and in-line assembly machine solutions designed for fully-automated production (align-&-attach) of photonic devices.

Photonics assembly and testing – From Lab to Fab –

ficonTEC provides device micro-assembly and testing solutions for the photonic device industry. These solutions are realized as cutting-edge, high-precision

Automated precision and micro assembly

We develop and test prototypes of individual production systems and machine components for the automated assembly of miniaturized laser systems, cameras and optical sensors in medium to large

OPTICAL ASSEMBLY SOLUTIONS

Whether in photonics, laser technology, or fiber optics, our scalable approach to high-precision automation ensures that our solutions align perfectly with your application needs.

Automated Photonic Device Assembly with Modular

The AssemblyLine systems from FiconTec are high-precision, in-line assembly solutions designed for the automated production of photonic devices.

Fully Automated Display Module Production Line for

Our automated line is a turnkey solution capable of handling a wide range of product types, including AMOLED, PMOLED, TFT, and STN displays. With a production

How Fresnel Factory Built an AI-Driven Automated Production Line for ...

If you are developing PIR motion sensors, TMOS-based sensing modules, or infrared optical assemblies, Fresnel Factory can support optical design, prototyping, performance evaluation,

Optical lens assembly

CALIN''s lens assembly process is carried out after a rigorous optical part manufacturing. Combine with optical lenses, plastic, metal, and electronic components to assemble the lens module.

Digitized assembly of complex optical systems. White paper

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

With this publication we would like to present the research approaches and results of the EverPro project in the context of precision assembly of optical systems.

Automated mass production line for optical module using passive ...

To attain both of low cost and high productivity, we developed passive alignment technique and optical coupling structure that is suitable for automatic assembly. We also developed

BOZHON: Industrial Equipment, Digital Equipment Manufacturer,

The automatic battery module assembly line from BOZHON is a highly efficient solution for assembling lithium batteries from single cells into modules and packs.

Automated mass production line for optical module using passive ...

Basically all modules have same optical coupling structure and keep the design rules for automatic assembly. Accordingly, we can use the same equipment for the same assembly process.

Automated Precision Assembly of Optical Systems

However, the bonding process sets limits to the repeatability that can be achieved in industrial and automated production of precision systems. In automated micro-assembly, controlled metering of the

Optical Transceivers Optical Module Assembly Line

Robo Assembly Line for Optical Transceivers and Optical Modules Key2Optics is the manufacturer for Optical Transceivers and Optical Modules which whidely installed for optical networking ...

OPTICAL ASSEMBLY SOLUTIONS

From Individual Modules to Turn-Key Solutions With the increasing demand for miniaturized, high-performance optical systems, the need for precise and fully automated assembly solutions has never

Design and development of an Automatic Optical ...

Visual inspection of components, subassemblies and final products is an essential step to ensure the quality control of ready-to-market electronic components. In many manufacturing plants,

Digitized assembly of complex optical systems. White paper

CHALLENGES IN AUTOMATED PRECISION OPTICS ASSEMBLY The production of newly developed optical systems often requires new, particularly precise assembly pro-cesses. The development of

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

Fiber Optic Cable Assembly Automation in Semiconductor Manufacturing

Integrated Testing and Verification Modules Incorporating tests (insertion loss/return loss/fiber continuity, etc.) on the assembly line, paired with automated testing equipment to reduce
