# Cable tray and conduit supplier

## Overview

Cable trays Manufacturer/producer Germany | B2B companies and 240 suppliers for cable trays Manufacturer/Producer Find wholesalers and contact them directl.

## Key Takeaways

Leading cable tray manufacturers include Atkore, Shielden, Snake Tray, and Delta Cable Trays, offering a wide range of trays and conduits for industrial, commercial, and data center applications.

### Major Cable Tray Manufacturers

Atkore provides a variety of cable tray systems, including channel trays, I-beam ladder trays, and fiberglass options. Their products feature pre-punched holes for easy cable attachment, lightweight aluminum construction, and corrosion resistance. Atkore also offers a full range of fittings such as elbows, tees, reducers, and branches to accommodate complex installations.

Shielden specializes in durable cable trays made from stainless steel, galvanized steel, aluminum, and fiberglass-reinforced plastic (FRP/GRP). They supply ladder trays, perforated trays, wire mesh trays, solid bottom trays, and channel trays suitable for industrial plants, offshore platforms, data centers, and renewable energy projects. Shielden emphasizes corrosion and fire resistance, custom solutions, and easy installation.

Snake Tray focuses on cost-effective cable management systems for data centers, solar installations, and transit projects. Their products are designed to reduce installation time and material waste, with a strong emphasis on sustainability and green manufacturing practices. Delta Cable Trays offers a complete range of cable management systems, including trays, ladders, trunking, and conduits.

They provide precision-engineered solutions to protect cables, prevent overheating, and ensure safe routing. Delta also manufactures conduits and junction boxes to shield cables from external damage, along with wire baskets, cable cleats, and support systems for organized installations.

### Conduit Solutions

Conduits are essential for protecting cables from mechanical damage, moisture, and environmental hazards. Manufacturers like Delta provide conduits and junction boxes that complement cable trays, ensuring reliable connectivity and durability. Conduits are available in various materials, including steel, aluminum, and PVC, depending on the application and environmental conditions.

### Choosing the Right System

When selecting a cable tray or conduit system, consider: Material: Aluminum and stainless steel for corrosion resistance; fiberglass for lightweight and chemical resistance. Tray Type: Ladder, perforated, wire mesh, or solid bottom depending on cable type and airflow requirements. Application: Industrial, commercial, offshore, or data center environments.

Installation: Pre-punched holes, modular fittings, and ease of maintenance can reduce labor costs. Customization: Some manufacturers offer tailored solutions to fit specific project needs. These manufacturers provide comprehensive solutions to ensure safe, organized, and efficient cable management across a wide range of industries.
