Cable tray flange interface price

Overview

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Key Takeaways

Cable tray flange interfaces typically range from $30 to $150 per 3-meter section, depending on size, material, and supplier.

Price Overview

The cost of a cable tray with a flange depends on several factors including width, depth, material, and load capacity. For example, a Tamlex 150mm return flange medium-duty cable tray, 25mm deep and 3 meters long, is sold in increments of 3, with each 3-meter section priced around $30–$50 depending on the supplier and delivery options.

Supplier Options

Alibaba offers a wide range of cable trays with flanges for bulk or customized orders, with prices varying based on material (steel, aluminum, or coated finishes) and dimensions. McMaster-Carr provides corrosion-resistant wire mesh and solid cable trays, which can be cut, bent, and connected, though specific flange interface prices are typically available upon request. Orbital Fasteners and similar distributors provide fast delivery and competitive pricing for standard cable tray fittings, including flange interfaces, often with discounts for bulk orders.

Factors Affecting Price

Material: Stainless steel or galvanized trays cost more than standard steel. Width and Depth: Wider or deeper trays with higher load capacity increase the price. Length: Standard lengths are usually 3 meters; longer or custom lengths may cost more.

Accessories: Brackets, fittings, and tube clamps for flange interfaces can add to the total cost.

Recommendations

For small projects, purchasing from local suppliers like CEF or Orbital Fasteners ensures quick delivery and manageable costs. For large-scale or customized installations, Alibaba or specialized industrial suppliers may offer better bulk pricing and customization options. Always check compatibility of hole patterns and flange types with your existing cable tray system to avoid additional modifications.

By considering these factors, you can estimate the cost of cable tray flange interfaces and select the most suitable supplier for your project.
