Cable tray pulling equipment

Overview

CABLE TRAY ROLLERS Archives | iTOOLcoExplore iTOOLco's cable tray rollers, designed for efficient installation and compatibility with various construction.

Key Takeaways

Cable tray pulling equipment includes tray rollers, sheaves, and heavy-duty rollers designed to make cable installation faster, safer, and more efficient.

Types of Cable Tray Pulling Equipment

Tray Rollers: These are designed to support and guide cables along cable trays, reducing friction and effort during pulls. They are particularly useful for long runs or when cables need to navigate bends and offsets. Greenlee offers a variety of tray rollers specifically engineered to make electricians' jobs easier. iTOOLco also provides a range of cable tray rollers suitable for different tray sizes and cable types.

Cable Tray Sheaves & Rollers: Sheaves are pulley-like devices that allow cables to move smoothly around corners or bends in the tray. They help prevent cable damage and reduce the physical strain on installers. Current Tools offers a selection of sheaves and rollers to meet the needs of electrical contractors.

Heavy-

Duty Cable Rollers: For larger or heavier cables, heavy-duty rollers like the Greenlee CTR200 are designed to assist pulling along non-basket-style trays. These rollers help manage load forces, especially near 90° bends and offsets, without taking up space inside the tray.

Benefits of Using Cable Tray Pulling Equipment

Reduced Labor and Fatigue: Rollers and sheaves minimize the physical effort required to pull cables, making installations faster and less strenuous. Cable Protection: Properly designed rollers prevent kinks, abrasions, and other damage to cables during installation. Efficiency in Complex Runs: Equipment like heavy-duty rollers and sheaves allow smooth navigation around bends and offsets, improving workflow and reducing installation time.

Safety: By reducing manual handling and strain, these tools help prevent injuries on the job site.

Additional Considerations

When selecting cable tray pulling equipment, consider the type of cable tray, cable size and weight, and the layout of the installation. Many manufacturers, such as iTOOLco, offer tools designed by electricians for electricians, ensuring practical usability and durability. Live demos and product specifications are often available to help choose the right equipment for specific projects.

Using the right combination of tray rollers, sheaves, and heavy-duty rollers can significantly improve the speed, safety, and quality of cable installations in commercial, industrial, and utility settings.
