Cable trays at the top of the tunnel

Overview

Cable trays are installed by anchoring brackets or threaded rods to solid surfaces on the tunnel wall or the ceiling of the tunnel, with modular sections that can be adjusted to follow the path and slope of the tunnel. Cable trays provide a support structure to lay out cables across hundreds of meters, without the likelihood of sagging or becoming tangled, or even getting in contact with the rough tunnel walls. This improves overall electrical cable organization in tunnels, making inspections and repairs. PohlCon supports you in efficiently planning and professionally implementing cable trays in tunnels. Our product solutions, such as cable trays and cable ladders. ass reinforced polyester) cable trays. With legrand at your side, you are choosing safety, high quality, expertise and a variety of solutions to ensure that your. 126,000 feet of cable installed in a single outage! Snake Rack™ your cables in tunnels! Install the backbone support structure for what you need now and for future growth.
