Can cable trays be used to build two brick walls

Overview

Cable trays are permitted for use in any type of building or structure, provided they comply with the relevant installation and support requirements outlined in NEC Article 392. This guide explains how to choose and install masonry anchors so cable brackets stay secure on hollow brick and block walls. The guide includes diagrams for mounting cable trays on walls using pre-fabricated flanges or channels, laying cables, and selecting the. Cable trays should be installed on buildings and structures (such as walls, columns, beams, floors, etc.) as much as possible, in close coordination with civil construction. For licensed electricians, mastering these principles is essential. Wall supports RVK are used for mounting 40 mm height KR-type cable trays to wall, mounting rails AS, ceiling supports HK1, HK2 and TP2 from the inner side of the cable trays.
