Core switch cannot access server

Overview

You can follow the following steps to troubleshoot: Check physical connections: Try reseating the connectors to ensure a proper connection. Inspect LED indicators: Typically, the Link/Activity LED should be lit, indicating activity is occurring. we are facinf and issue with ping from access to core core management vlan 98 192. 0 uplink trunk port enabled allowed vlan. Atttached is the visio for it. The factory network has an ASA, a nexus 5k. Our Cisco ASA is used to terminate the link between our factory & the other business. The Router is set to use the wrong interface for the NAT overload. It is. We already rebooted both switches, we tried serial port access (always present Authentication Failed message) we tried to reset all the settings and restore from a backup, but the restore operation failed with a series of invalid commands (It seems that when it was taken, the equipment was running. The router is connected to ISP which is 3500 series. Any help please?

Here is the configuration: 1 Router Building. We have currently 2 switches CIsco C9300-NM-8X SFP+ and C9200 4SFP in a server room. Planning to rewire 2 buildings requiring at least 10 to 12 switches connecting IP phone and PC respectively. Server to all switch distance will be max. 50-60m. How can I connect them to core.

Solved: unable to reach server from core

If we try to reach BU server 192.168.2.x from within one of our server 192.168.101.x, it is not reachable. The Core switch has a route pointing the traffic towards ASA for this.

Internet not reaching Core/Access Switch

Corrected but still no internet access on Core Switch. Have you looked at the vlan database and verified that the core switches had the vlans created ? It seems to me you are routing

I totally fucked up our network core switch and everything is ...

We have a pair of Dell N3224P-ON switches and today''s morning my colleague gave me a task and instructions to remove some unused VLANs. I''m sure I removed the correct VLANs. When I saved

Connecting Core to Access switches

I would recommend at least 2 copper runs per switch, which you can then put in a port channel, so that you have 2 Gbps of uplink for all of your edge switches. If you are planning on just

Network Switch Troubleshooting Guide: Common Problems and
