# Detailed Explanation and Pricing of Level 3 Distribution Boxes

## Overview

Learn how to choose a distribution box and understand its internal structure, including MCBs, busbars, neutral bars, earth bars, RCDs, RCBOs, SPDs, enclosure ratings, and wiring layout.

## Key Takeaways

Level 3 distribution boxes typically range from $40 to $200 per unit, depending on material, certification, and additional features. Price Ranges by Material and TypePlastic residential boxes: $10–$25, mainly for home use and low-load applications. Steel industrial boxes: Around $40, suitable for higher load and industrial environments.

High-end or certified boxes: IEC61439-certified boxes can cost 20–30% more than non-certified units due to enhanced safety, reliability, and testing requirements. Premium brands: Schneider Electric, Siemens, ABB, and Chint Electric offer high-quality distribution boxes with prices on the higher end of the spectrum, reflecting brand reputation and after-sales support.

### Factors Affecting Pricing

Material and Build Quality: Steel or hybrid metal boxes are more expensive than plastic but offer better durability and fire resistance. Certification: Certified products (IEC or equivalent) ensure compliance with international safety standards, increasing cost. Design Complexity: Boxes with intelligent monitoring, surge protection, or modular designs are priced higher.

Installation Type: Embedded boxes cost $10–$30 more per unit than pre-assembled types due to additional labor.

### Number of Outlets/

Capacity: Level 3 boxes, which connect to end-use equipment, may have multiple outlets or higher amperage ratings, influencing cost.

### Advanced Features and Future Trends

Modern level 3 distribution boxes are evolving into intelligent energy managers, incorporating: Built-in batteries for peak-demand usageSensors for vibration, heat, and moisture monitoringAutomated rerouting of power in case of cable damage These features can significantly increase the price but improve system reliability and reduce long-term maintenance costs.

### Summary

For budgeting purposes, expect level 3 distribution boxes to cost between $40 and $200 per unit, with additional costs for certified, high-capacity, or smart-feature models. Installation and material choices can further influence the total expenditure. For precise quotes, contacting suppliers like GEYA, Schneider Electric, or local distributors is recommended.
