Dimensions of the distribution box XXM

Overview

XXM type distribution box (distribution board)-Henan Yingkai Electric. This series of products is a terminal combination electrical distribution box with.

Key Takeaways

The XXM distribution box comes in customizable dimensions, adaptable to various installation and application requirements.

Overview

The XX

M series distribution boxes are designed for lighting and power control, available in universal, outdoor, and transparent window types. They can be installed as surface-mounted or recessed wall-mounted units, depending on user needs, and are suitable for applications such as air conditioning control, water pump control, fan control, and machine tool drive control.

Customizable Dimensions

The structural dimensions of the XXM series are customizable, allowing clients to specify height, width, and depth according to the installation site and electrical component requirements. The interior includes detachable color-coated mounting plates and optional inner door mounting brackets, which can influence the internal usable space. Knockouts on the top and bottom walls accommodate cables and conduits of various specifications, which may also affect the overall enclosure size.

Installation ConsiderationsSurface-mounted or recessed installation: The choice affects the external dimensions and the depth required for wall recesses. Front operation and maintenance: The door opens beyond 135 degrees, and the inner door is reinforced for wiring ducts, which may require additional clearance. Variants: Outdoor and transparent window types may have slightly different dimensions to accommodate environmental protection or visibility requirements.

Recommendation

For precise dimensions, it is recommended to contact the manufacturer or supplier with your specific requirements, including the number of circuits, rated current, and installation type. This ensures the distribution box is tailored to your project while complying with standards such as IEC439 and GB7251. 3.

In summary, the XXM distribution box does not have fixed dimensions; it is designed to be flexible and customizable to meet diverse electrical and installation needs.
