Distribution Network Automation PoE Switch NRZ

Overview

With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these modular switches are your foundation for industrial AI. Two prominent approaches have emerged: Power over Ethernet (PoE), which bundles low-voltage DC power with data over standard Ethernet cables, and DC power distribution systems, which deliver direct current through dedicated wiring or bus architectures. As a core component of this system, PoE switches are increasingly becoming indispensable network. Elevate your industrial operations with an AI-ready, rugged network that offers peak performance, high resilience, advanced security—and that smoothly integrates IT proficiencies into OT environments. Increase productivity, boost security, and empower industrial AI with Cisco's wide range of. RAD's PowerFlow-2 is an industrial-grade, managed Fast Ethernet and Gigabit Ethernet switch, with or without Power over Ethernet (PoE) support.
