Key Takeaways

Dominic vertical shaft cable trays typically range from $1 to $50 per unit depending on material, size, and supplier.

Estimated Pricing

The cost of a vertical shaft cable tray varies widely based on material, dimensions, and load capacity: Basic steel or pre-galvanized trays: Starting around $0. 95 to $5 per unit for small or standard sections, suitable for indoor or light-duty applications. Hot-dip galvanized or aluminum trays: Typically $10 to $30 per unit, offering better corrosion resistance and lighter weight for industrial or outdoor use.

Stainless steel trays: Can reach $40 to $50 or more per unit, used in highly corrosive environments such as food processing plants or coastal installations.

Factors Affecting Price

Material: Steel is cheapest, aluminum is lightweight but more expensive, and stainless steel is the most costly. Height and width: Taller or wider vertical trays require more material, increasing cost. Load capacity: Heavy-duty trays designed to support large cable bundles are priced higher.

Supplier and brand: Dominic brand trays may carry a premium compared to generic or bulk-manufactured trays. Accessories: Couplers, brackets, and fasteners are often sold separately, adding to the total installation cost.

Purchasing Options

Online marketplaces like Alibaba offer customizable vertical cable trays at low starting prices, ideal for small projects or bulk orders. Specialized suppliers such as Shandong Bolt Electrical Equipment provide detailed product catalogs and quotations for vertical shaft cable trays. Used or surplus trays may be available through machinery resale platforms, potentially reducing costs for large installations.

In summary, while a Dominic vertical shaft cable tray can start at under $1 for basic units, most industrial-grade trays suitable for commercial installations will cost $10–$50 per unit, depending on material, size, and load requirements.
