EPON device broadband port

Overview

Independent 1U chassis equipment with 16 PON ports, each port supports up to 64 ONUs, the whole device supports up to 1024 ONUs. PON (Passive Optical Network), as an access network technology, can implement fiber optic to the home, satisfying the high-bandwidth requirement of the "last kilometer" in the access layer network. The PON technology includes: · Ethernet PON (EPON), a passive optical network based on Ethernet, is. A passive optical network (PON) is a fiber-optic telecommunications network that uses only unpowered devices to carry signals, as opposed to electronic equipment. In practice, PONs are typically used for the last mile between Internet service providers (ISP) and their customers. 3ah standards issued in June 2004. The network has an Optical Line Terminal (OLT). There is no need for. PTF3004-2T economical and high performance EPON OLT is a 1U standard rack-mounted equipment complying with IEEE802. The product is particularly suitable for. PTF3616E EPON OLT, which provides 16 EPON ports, 12 uplink ports (4*GE copper RJ45 ethernet ports, 4*SFP (GE) and 4*SFP+ (10GE)), it has high reliability, highly dense broadband access and robust switching and routing abilities, is a new generation of broadband and multiservice access OLT devices.

Passive optical network

OverviewComponents and characteristicsHistoryNetwork elementsUpstream bandwidth allocationVariantsEnabling technologiesFiber to the premises

A passive optical network (PON) is a fiber-optic telecommunications network that uses only unpowered devices to carry signals, as opposed to electronic equipment. In practice, PONs are typically used for the last mile between Internet service providers (ISP) and their customers. In this use, a PON has a point-to-multipoint topology in which an ISP uses a single device to serve many end-user sites using a system suc

EPON Explained: Unlocking High-Speed Fiber Networks with Passive ...

In today''s connected world, EPON (Ethernet Passive Optical Network) is a game-changer for delivering blazing-fast internet. This guide dives deep into EPON technology, its benefits

Shenzhen Photon Broadband Tech Co., Ltd. -4 Ports

PTF3004 has 4 PON ports, 8 uplink ports (4*GE copper RJ45 ethernet ports, 2*GE (SFP)+2*10GE). Each of PON port supports up to 64 ONUs, the whole device

Shenzhen Photon Broadband Tech Co., Ltd. -16 PON

Independent 1U chassis equipment with 16 PON ports, each port supports up to 64 ONUs, the whole device supports up to 1024 ONUs. Small size and high density

What Is Passive Optical Networking (PON)? GPON vs. EPON

Passive Optical Network (PON) is a point-to-multipoint optical access technology. Ethernet PON (EPON) and gigabit PON (GPON) are the most common PON technologies and have the

Cisco 10G Routed PON ONT Data Sheet

It delivers secure, high-speed broadband access with flexible deployment in metro and business settings. The ENC-10G-ONT-10 comes with built-in XGS-PON optics and MAC, an

Astel OLT EPON 4 PON Ports

Each of the PON Ports support upto 64 ONU''s, the whole device support upto 256 ONU. This model is a small size OLT, easy to install, convenient, flexible, easy to deploy and high performance broadband

SDX 6000 Series

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

Our SDX 6000 Series of software-defined optical line terminals (OLTs) consists of open and disaggregated access devices that support a broad range of PON standards, including 10G Combo

GPON vs EPON, What''s the Difference?

Compare GPON vs EPON for your FTTH deployment. Learn bandwidth, scalability, QoS, and cost differences to choose the best PON technology for your network.

PON, EPON, GPON: Everything You Need to Know

Fiber optic Internet is a superfast broadband connection. On an optic fiber line, information is transmitted through pulses of infrared light. To better understand fiber optics, there are a handful of terms and

The basics of PON, EPON & GPON

The basics of PON, EPON & GPON Fiber optic Internet is a high-speed broadband connection. Information is delivered across an optic fiber line using infrared light pulses.

How to Choose the Best XPON ONU/ONT Routers for Your Home

This guide will help you understand key factors to consider when selecting an XPON router for your home or business. Related Product: Epon Olt 4 Port What is an XPON ONU/ONT

A Step-by-Step Introduction to EPON Modules

EPON modules play a pivotal role in facilitating fast and reliable data transmission over fiber optic networks, offering enhanced bandwidth capabilities and improved network efficiency. In

What Is Passive Optical Networking (PON)? GPON vs. EPON

What Is PON? Passive Optical Network (PON) is a point-to-multipoint optical access technology. It uses only optical fibers to transmit data, voice, and video services. A PON network

EPON, a long-haul Ethernet access technology

EPON is a long-range Ethernet access technology based on fiber optic transport network that adopts a point-to-multipoint architecture.

Passive Optical Networks: An intro to xPON

Passive Optical Networks represent a significant advancement in telecommunications technology, offering high-speed, reliable, and cost-effective broadband solutions.

PON Network: the Differences of GPON and EPON

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

The ODN does not contain any active electronic devices and electronic power supplies. All of them are composed of passive components such as splitters, which have low management and

Syrotech XPON (EPON + GPON) ONU Modem for Fiber Broadband

Syrotech XPON (EPON + GPON) ONU Modem for Fiber Broadband Connection | GPON Port, LAN Port, Reset and Power | SY-GPON-1000R-DONT Router 0 GHz 1024 Mbps Wifi Speed NA Ethernet
