Key Takeaways

Stainless steel cable tray prices in the EU typically range from €20 to €150 per meter, depending on material grade, tray type, width, and supplier.

Key Factors Affecting Price

Material Grade: Stainless steel trays are commonly available in 304 and 316 grades. Grade 316, being more corrosion-resistant, is generally 10–30% more expensive than 304, especially for outdoor or marine applications. Tray Type and Duty: Wire basket trays are lightweight and cost-effective, suitable for food, beverage, and cleanroom environments.

Solid or perforated trays are medium-duty, ideal for industrial and commercial installations. Heavy-duty return flange trays are used in oil, gas, petrochemical, and offshore projects, commanding higher prices due to strength and material thickness. Tray Width and Length: Standard widths range from 50 mm to 900 mm, with wider trays costing more due to increased material usage.

Most suppliers offer pre-cut lengths or custom sizes, which can affect pricing. Accessories and Customization: Couplers, bends, tees, risers, and optional lids add to the total cost. Custom designs or rapid delivery may also increase prices.

Supplier and Discounts: European suppliers like Electrix, Trayco, and CableJoints offer bulk discounts, daily dispatch, and custom quotes. Prices can vary significantly depending on whether you buy direct from manufacturer or through distributors.

Check Online Catalogs: Suppliers like Electrix allow you to create an account to view prices and order online.

Consider Bulk Orders: Large orders often qualify for discounts, especially for standard lengths and common widths. Factor in Delivery: Shipping costs vary across EU countries and may affect the final price. By considering these factors, you can estimate costs for your project and contact suppliers for precise pricing tailored to your requirements.
