Egypt Telecom Fiber Optic Cable Outage

Overview

Mobile and internet services in parts of Greater Cairo were disrupted for three hours early on Thursday due to fibre optic cable works near the Grand Egyptian Museum (GEM), Egypt's telecoms regulator said. Telecom Egypt provides telecommunications services including fixed-line voice, broadband internet, mobile networks through WE, data connectivity and cloud solutions for residential and business customers. This map shows where user reports are concentrated over the past 24 hours. Some problems are. Per-ISP signals are measured when the country shows anomalies (and continuously for pilot countries); «No data» means no anomaly drill has been needed recently. “Signal dip” compares the current BGP-visibility and active-probing levels against the median of the previous 24 hours, corrected for. A month-long disruption to internet services provided by state-run Telecom Egypt (WE) was caused by a system upgrade and a malfunctioning server, a company source told Al Manassa on Monday. The source admitted to hundreds of customer complaints and said full service would resume within days. The. The Internet Outages Map harnesses ThousandEyes' global platform to detect and display outages in ISPs, public cloud services, and edge service networks like CDNs, DNS, and SECaaS. The Internet Outages Map surfaces outage events across 124 of the top SaaS applications as well as major consumer. This graph shows additional details related to IODA's Active Probing measurements, including Round-Trip Time (RTT) Latency and the percentage of IODA's probe packets that did not get a response.
