Electric wire slot in the distribution box

Overview

Slotted duct, also known as wiring duct or channel raceways, are rigid PVC channels featuring open slots along their sides. These slots are designed to allow easy insertion and routing of wires, facilitating organised cable management. A distribution box is the heart of any electrical system. It takes the incoming power and safely distributes it to different circuits throughout your building. Most of them have busbars, neutral busbar, ground busbar, ground rod, main breaker, 1-pole and 2 pole breaker etc. In this article, we will. Distribution board is a safe system designed for house or building that included protective devices, isolator switches, circuit breaker and fuses to connect safely the cables and wires to the sub circuits and final sub circuits including their associated Live (Phase) Neutral and Earth conductors.

Article Content

Busbar, Bus Stab, Breaker Slot and Circuit Space in a

A bus stab in an electrical panel is the metal contact point on the busbar where a circuit breaker connects (clips on) to receive electrical power and distribute to the
