Explosion-proof Stainless Steel Network Cabinet Manufacturer

Overview

Get the high-quality solutions you need, delivered through our global network of 3,000+ distributors.

Key Takeaways

Leading manufacturers of explosion-proof stainless steel network cabinets include R.

STAH

L, ROSE Systemtechnik, Rittal, Bartakke Electrofab, and HWASIN Industrial Systems, offering ATEX/IECEx-certified enclosures for hazardous areas. Key Manufacturers and OfferingsR.

STAH

L provides the EXpressure Ex d cabinets, which are lightweight stainless steel enclosures designed for Zone 1 and Zone 2 hazardous areas. These cabinets feature thin-walled stainless steel panels with wire mesh grids that dissipate explosion pressure, allowing safe installation of network equipment such as routers, switches, LTE/5G devices, and protocol converters in hazardous environments.

ROS

E Systemtechnik offers a range of stainless steel Ex enclosures compliant with ATEX and IEC standards. Their enclosures are available in various sizes and types, including flameproof and intrinsically safe designs, suitable for gas and dust hazardous zones.

ROS

E also provides aluminium and polyester explosion-proof enclosures for diverse industrial applications. Rittal manufactures ATEX- and IEC-rated stainless steel enclosures for Zones 1, 2, 21, and 22. These Type 304 stainless steel units include foamed-in-place silicone gaskets for reliable protection in explosive atmospheres and are available in multiple standard sizes.

Bartakke Electrofab specializes in custom stainless steel and explosion-proof enclosures for automation, energy, pharmaceutical, and hazardous industrial applications. Their product lines, including EncloINOX, EncloSHIELD, and EncloPRIME, offer IP65-rated protection, corrosion resistance, modularity, and compliance with global safety standards. Bartakke supports both domestic and international projects with tailored solutions for hazardous areas.

HWASI

N Industrial Systems provides a wide range of stainless steel and explosion-proof enclosures for industries such as chemicals, electronics, and infrastructure. Their enclosures are certified under UL, TUV, CE, IECEx, ATEX, and KCs standards, ensuring compliance with international safety regulations.

Considerations for Selection

When choosing an explosion-proof stainless steel network cabinet, consider: Certification: ATEX, IECEx, UL, or other relevant hazardous-area approvals. Material and Corrosion Resistance: Stainless steel grades (e.g., 304 or 316) for durability in harsh environments.

I

P Rating: Protection against dust and water ingress (e.g., IP65 or higher). Modularity and Customization: Ability to accommodate network equipment, cable entry, ventilation, and multi-compartment configurations. Application Zone: Ensure suitability for Zone 1, Zone 2, or other hazardous classifications.

These manufacturers provide reliable solutions for industrial networking in hazardous areas, combining safety, durability, and flexibility for modern digital infrastructure.
