Extinction Ratio Tester Calibration in Libya

Overview

The invention relates to the technical field of optical fiber sensing, in particular to a calibration device and a calibration method for an extinction ratio tester with adjustable...

Key Takeaways

Extinction Ratio Testers, such as the PEM-400, can be calibrated in Libya through ISO/IEC 17025-accredited laboratories offering traceable and professional services.

Local Calibration Providers

Several Libyan companies provide professional calibration services suitable for optical test equipment: Libyan Calibration Services (LCS): Offers calibration for various industrial and service measuring devices, maintaining accuracy, precision, and reliability according to ISO/IEC 17025 standards. They employ trained technical staff and continuously update their laboratory equipment to support high-quality calibration services in Libya.

Petro

Trust Services: Provides on-site and laboratory calibration for instrumentation, including traceable certificates aligned with international standards. Their services cover installation, pre-commissioning, and ongoing maintenance, ensuring instruments like extinction ratio testers remain accurate and compliant. Almithak Calibration Laboratory (MCL): Located in Tripoli, this private company specializes in high-quality inspection and calibration services for industrial equipment, including optical and measurement devices used in oil, gas, and industrial sectors.

Extinction Ratio Tester Calibration

The Polarization Extinction Ratio (PER) Meter, such as the PEM-400, measures the polarization extinction ratio of polarization-maintaining components. Calibration ensures: Accurate measurement of PER up to 30 dB and angle of polarizationCorrect insertion loss (IL) readings for passive componentsReliable output power measurements for active components Calibration typically involves using traceable reference standards and may include multichannel verification for fiber arrays or laser modules.

Key Considerations

Ensure the calibration provider issues ISO/IEC 17025-compliant certificates for traceability. Confirm the laboratory can handle the specific wavelengths and channel counts of your extinction ratio tester. On-site calibration may be available for large or sensitive equipment, while laboratory calibration ensures controlled conditions for high-precision measurements.

Regular calibration is recommended to maintain measurement accuracy and compliance with industry standards, especially in optical communications and high-precision instrumentation. By selecting a certified Libyan calibration laboratory, you can maintain the reliability and accuracy of your extinction ratio testers, ensuring consistent performance in optical testing and industrial applications.

Almithak Calibration -

ALMITHAK Calibration Laboratory MCL is a private owned Libyan company operating in the calibration, incorporated in Tripoli on 2013, and has started to provide services in May 2013.

PetroTrust Services

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

The services we provide include installation to pre-commissioning and commissioning, site acceptance testing and personnel introductory training. We will also advise on operating and maintenance

About Us

ALMITHAK has been established in accordance to the Libyan Law, comply with the standard for laboratories (ISO17025) and they run the below mentioned laboratories. Calibration is performed in

Services

Mezan company founded on 5 Dec 2010 in Tripoli for the purpose off carrying out the calibration, measurement and deferent tests and inspections for the public and private sector in order to ensure

Calibration services

We provide professional calibration services, specializing in tool, torque, and angle calibration and quality assurance equipment calibration performed by our certified technicians.

Libya Laboratory Equipment Tenders, Bids and RFP

TendersOnTime, the best online tenders portal, provides latest Libya Laboratory Equipment tenders, RFP, Bids and eprocurement notices from various states and counties in Libya.

About Libyan Calibration Services

About Us Libyan calibration services (LCS) provides professional calibration services for different measuring equipment owned by industrial, and service enterprises operating in Libya.

PetroTrust Services

Regular calibration and certification is essential to keep the instrumentation measuring and controlling your critical processes in spec. PetroTrust provides timely, traceable, and cost-effective services that

Measuring Extinction Ratio of Optical Transmitters

Introduction Optical transmitters used in high-speed digital communication systems are typically required to maintain a specific set of perfor-mance levels. One parameter, extinction ratio, is used to describe

Libya 2 | EROS CalVal Center of Excellence

© 2026 FD SOLUCIONES OPTICAL SYSTEMS - All rights reserved

Test Sites Catalog Libya 2 ... Description The Libya 2 Pseudo-Invariant Calibration Site (PICS), located in the Sahara Desert, is a well-established reference site for the calibration and validation of optical

About Us

Calibration is performed in our laboratory or in field, everywhere in Libya, according to the conditions and technical requirements. To ensure providing high quality service, the company has acquired modern

Measuring instruments in oil field

Libyan calibration services (LCS) provides calibration and maintenance services for pressure and temperature measuring instruments in all oil and gas field

Libyan Calibration Services Company

Our company employs professional technical team in the field of calibration services, Our Company arranges continues training courses for our team members inside, and outside Libya according to the

Characterization of the Libyan desert in support of vicarious calibration

Characterizing and understanding these sites is key to successful vicarious calibration. This study focuses on the common pseudo-invariant test site, Libya 4, located in the Saharan desert and two

LCS Company Profile | PDF | Calibration | Libya

Libyan Calibration Services Co. (LCS), founded in 2012, is a leading provider of calibration services in Libya, focusing on accuracy and adherence to ISO 17025 standards. The company offers a wide
