Fiber Optic Cable Marking Tape Manufacturer

Overview

Fiber Optic Warning Tapes | SpanLiteWe manufacture detectable marking tapes with integrated metallic elements (foil or wire) designed to assist in undergro.

Key Takeaways

Leading manufacturers of fiber optic cable pre-formed marking tapes include HellermannTyton, LAPP, Lenzing Plastics, and SpanLite, offering durable, customizable, and industrial-grade solutions. Key Manufacturers and OfferingsHellermannTyton produces pre-formed fiber optic cable marker tapes that are non-adhesive, pre-coiled, and UV-resistant, allowing installation over dirty or oily surfaces at any temperature. Their tapes are typically 1" wide with repeated legends such as "FIBER OPTIC CABLE," protected by a clear acrylic layer for abrasion resistance, making them suitable for industrial and telecom environments.

LAP

P offers customized cable and single-core markings, including embossed stainless steel markers, perforated and printed shrink hoses, and plastic labels. Their products are designed for quick installation on fiber optic cables and can be tailored to customer specifications, reducing installation time and supporting complex network layouts. Lenzing Plastics manufactures cable marking tapes in various materials such as PP, PET, PA, or PE, with options for custom colors, prints, and small batch sizes.

Their tapes are engineered for high mechanical performance and smooth production processes, making them suitable for both standard and specialized fiber optic applications.

Span

Lite specializes in telecom-focused marking solutions, including detectable and non-detectable underground warning tapes, custom printed identification tapes, and high-visibility marking systems. Their products are designed for harsh soil conditions, moisture resistance, and long-term underground performance, supporting large-scale fiber deployment projects.

Considerations for Selection

Material and Durability: Choose tapes with UV protection, abrasion resistance, and moisture tolerance for outdoor or underground use. Installation Method: Pre-formed, non-adhesive tapes allow easy installation without adhesives, while shrink hoses or threaded markers may be preferred for specific cable types. Customization: Many manufacturers offer custom printing for cable type, network information, or warnings.

Compliance and Standards: Ensure tapes meet industry standards for telecom or industrial fiber optic installations. These manufacturers provide a range of solutions suitable for industrial, telecom, and underground fiber optic cable marking, with options for customization, durability, and ease of installation.
