Fiber Optic Connector Products

Overview

Fibre Optic Connectors | Farnell® GermanyFind a huge range of Fibre Optic Connectors at Farnell® Germany. We stock a large selection of Fibre Optic Connect.

Key Takeaways

Fiber optic connectors are compatible with a wide range of products including LC, SC, ST, and FC connectors, as well as optical transceivers and modules designed for specific network environments. Common Fiber Optic Connector TypesLC (Lucent Connector): Compact, latch-style connector ideal for high-density data centers and duplex or simplex configurations, widely used in modern network equipment.

S

C (Subscriber Connector): Square push-pull connector suitable for FTTH, telecom, and outdoor carrier networks, offering durability and low insertion loss.

S

T (Straight Tip): Bayonet-style connector used in legacy systems, industrial, and military applications where robust mechanical connections are required.

F

C (Ferrule Connector): Threaded connector providing secure attachment in high-vibration environments such as factories, railways, or aviation systems.

Compatible Products

Fiber optic connectors are used with a variety of products, including: Optical Transceivers: Devices like SFP, SFP+, XFP, CFP, and QSFP28 modules adopt LC or MPO interfaces and support data rates from 1. 25Gb to 100Gb, suitable for data centers, telecom, and metropolitan networks. Active Optical Cables (AOC): Pre-terminated cables with LC or MPO connectors for high-speed interconnects in data centers and enterprise networks.

Hermaphroditic Connectors: Multi-channel connectors designed for harsh environments, supporting 2–32 channels and compliant with military or broadcast standards. Panel and Modular Connectors: Used in patch panels or closures for organized network management, supporting indoor and outdoor applications with dust and waterproof protection.

Selection Considerations

When choosing products for fiber optic connectors, consider: Fiber Type: Single-mode or multimode compatibility depending on core size and network requirements. Environmental Conditions: Indoor connectors for controlled environments, outdoor connectors for harsh conditions with sealing and protection. Density and Space: LC connectors for high-density installations, SC for more robust or outdoor setups.

Performance Requirements: Low insertion loss, return loss, and durability for frequent plug/unplug cycles. By matching the connector type with the appropriate transceiver, cable, or modular product, you can ensure reliable, high-performance fiber optic network connections across various applications.
