Fiber Optic Feeder Cable Price

Overview

Fiber-optic cable materials typically cost $1 to $6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from $15,000 to $30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. This article summarizes the latest fiber optic price data as of June, 2026, along with the recent timeline of price changes and the factors behind the surge. Ideal for telecommunications, data centres and networking applications, our fibre optic cables are available in single-mode and multimode configurations. Fiber optic feeder cables are essential components in modern telecommunications and data networks, serving as the backbone that delivers high-speed optical signals from central hubs to distribution points. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help.
