Fiber Optic Switches for Industrial Control

Overview

Industrial fiber optic Ethernet switches are designed to deliver stable, long-distance, and interference-resistant network connectivity in harsh industrial environments where copper Ethernet is limited by distance or electromagnetic noise. Our industrial fiber switch portfolio covers Fast Ethernet. Fiber-optic transmission is a process in which the transmission of fiber-optic signals or their pulses from the source to the destination is carried out using industrial fiber-optic switches. This activity takes place at Layer 2 or the data link layer of the network model. Find the perfect industrial fiber switch for your needs and shop today. They are used for connecting multiple IP equipment such as CCTV cameras, wireless access points, IP phones, computers, access. Deterministic fiber optic networks with TSN support, EMC-immune DIN rail systems and highly available redundancy architectures for critical production lines.
