Fiber optic cable 200g

Overview

200G AOC cables deliver high density and speed, supporting next-generation Ethernet applications. With a reach of up to 100 meters, 200G AOCs are immune to electromagnetic interference and backward compatible with 100G systems, enabling flexible and scalable network setups. For data-intensive applications, speed, reliability, and cost-effectiveness are critical. Whether you are building a new data center, upgrading existing. The 200G QSFP56 active optical cable is designed for use in 200 Gigabit Ethernet links over OM3 multimode fibre, it contains four multi-mode fibres (MMF) optic transceivers per end, each operating at data rates of up to 50Gb/s. This active optical cable is compliant with IEEE 802. 3, SFF-8665. The Cisco ® family of QSFP modules provide solutions for AI/ML data center applications, Network Interface Cards (NICs) on servers, and for data center switches, while leveraging the breakout capabilities and backward compatibility to lower-speed QSFP pluggable modules and cables.
