Finished fiber optic cable SC port

Overview

SC stands for Subscriber Connector and is one of the most widely recognized fiber terminations in telecom. 5 mm ceramic ferrule within a rectangular body and a simple push-pull latch that provides a positive click when seated. Fiber optic cable assembly quality hinges on selecting the right connector type—most commonly LC, SC, or ST—to match device ports and installation environment. LC connectors dominate high-density panels and modern transceivers (SFP/SFP+, QSFP), while SC remains common in enterprise and FTTH; ST. SC field polish connectors are TIA/EIA-604 FOCIS-3 compliant. 15dB (singlemode) per mated pair. Our 19-inch rack-mount panels are constructed from. 06 cold-rolled steel with durable black powder coat finish. 5/125 or 50/125) and. While the small size of fibre optic connectors does not mean they play a minor role, the type of connector you use affects the overall efficiency of light transmission across the fibre network. They also have return loss over 50 dB, keeping networks stable.
