Hand-shaped Intelligent Optical Power Meter

Overview

A dual-functional tool integrating handheld and intelligent units, designed for precise fiber optic power measurement. FOPM-203 handheld optical power meter is the advanced version of optical power meter series, which is more functional and intelligent. KI 2600-InGaAs A handheld power meter for use by professional installers and contractors, to test power, loss and continuity on single mode & multimode fiber optic systems. This full-feature instrument has comprehensive report generation. STD800 series mini Optical Power Meter and red light all-in-one machine series are controlled by single-chip microprocessor but multifunction. The whole machine has automatic shutdown function, three red light modes, backlight display. Viavi offers multiple handheld power meter options which are highlighted below: Measures optical power via a USB 2. 0 connection to a PC/laptop/smart device – makes digital processing of optical power measurements possible and integrates directly with the VIAVI FiberChekPRO and FiberChekMOBILE. The PM400 console is compatible with all Thorlabs' C-Series Pyroelectric Energy Sensors except the ES408C Fast Pyroelectric Energy Sensor.
