High-grade cable trays

Overview

Heavy duty cable trays and cable ladders are manufactured from pre-galvanized, electro-galvanized, or hot-dipped galvanized sheet metal, designed to meet ideal environmental working conditions for indoor and outdoor use in commercial or industrial environments with high cable. Heavy duty cable trays and cable ladders are manufactured from pre-galvanized, electro-galvanized, or hot-dipped galvanized sheet metal, designed to meet ideal environmental working conditions for indoor and outdoor use in commercial or industrial environments with high cable. Marlin Steel's wire mesh cable trays are designed for high-performance cable management in data centers, industrial manufacturing, power distribution systems, and commercial infrastructure projects. Engineered for durability and airflow, our systems provide a robust, flexible, and easy-to-install. EAE cable trays and ladders provide high-strength cable protection that protects the cables from external factors. EAE cable trays are mass produced with the 'Roll Forming' method on automatic production lines. The standard tray length is 3m. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Our Wire Mesh Tray creates a dedicated pathway for all low-voltage and data cables.
