How heavy is the wall-mounted distribution box

Overview

Capable of supporting up to 32 fiber ports, the FDB optical fiber distribution box features a protective enclosure with an anti-theft locking mechanism.

Key Takeaways

Wall-mounted distribution boxes typically weigh between 5 kg and 25 kg, depending on size, material, and included components.

Typical Weight Ranges

Small plastic enclosures (e.g., ASA or polycarbonate, single-phase, 200A rating) generally weigh around 5–8 kg. Medium metal enclosures (e.g., IP65-rated steel boxes, 400x300x200 mm) usually weigh 10–15 kg when empty. Larger wall-mounted units designed for commercial or light industrial use, with multiple compartments or busbars, can weigh 20–25 kg or more, depending on the number of breakers, contactors, and internal mounting plates.

Factors Affecting Weight

Material: Metal boxes (steel or aluminum) are heavier than plastic (ASA, polycarbonate) enclosures. Size and Dimensions: Larger boxes with more internal space for components naturally weigh more.

P Rating: Higher protection ratings (e.g., IP65) often require thicker walls and heavier doors, increasing weight. Internal Components: Pre-installed busbars, breakers, or mounting plates add to the total weight. Empty enclosures are lighter, while fully equipped units can double the weight.

Mounting Hardware: Wall brackets, studs, and fasteners contribute slightly to the overall weight.

Installation Considerations

Ensure the wall can support the combined weight of the enclosure and installed components. Use appropriate fasteners (expansion bolts or through-wall anchors) for metal or concrete walls. Position the box at a height that allows safe access to breakers and terminals while considering ergonomic handling during installation.

In summary, wall-mounted distribution boxes vary widely in weight, but for most residential and light commercial applications, expect 5–25 kg depending on size, material, and configuration. Always check the manufacturer's datasheet for exact weights before installation.
