

# How long should the hole be drilled in the wall for a mobile fiber distribution box

## Overview

FTTH Network Design - Long Hole, Feeder & Distribution Rules I'm happy to share a few important rules we follow while designing and deploying FTTH (Fiber to the Home) networks - especially related to Long Hole design, Feeder, and Distribution (both Buried & . FTTH Network Design - Long Hole, Feeder & Distribution Rules I'm happy to share a few important rules we follow while designing and deploying FTTH (Fiber to the Home) networks - especially related to Long Hole design, Feeder, and Distribution (both Buried & . Question regarding the size of the hole that residential fiber optic would likely require in order to pass through walls/joists in a typical residential first time installation. I know about how a big the cable is, but is there a something else at the end of the cable to facilitate pulling it. Does anyone know what size hole needs to be drilled?

Also does the inside box need to go directly opposite the outside box or can I put it anywhere as long as I can get the cable to it and it has a power source?

Solved! Go to Solution. try google search this one find. Installing a fiber wall socket (also called an FTTH outlet or optical termination point) is critical for maximizing your fiber internet speed and reliability. While ISPs often handle this, DIY installation can save time and money—if done correctly. FTTH Long Hole. The lenght of the run is (pessimistically) 9m. If I knew what size hole do drill I could prepare the route all the way from the outside wall to "under the stairs". Here is a drawing of what I am struggling with.

## Article Content

Residential fiber optic installation : r/FiberOptics

If you want your fiber anywhere other than right beside where it enters the house, you're on the right track. I'd recommend 3/4" holes at a minimum, ideally 1". Pull string or cheap cable pre installed in

Fiber Internet Installation Guide | BroadbandSearch

Drilling the Entry Point: A small hole (approximately ½ inch) is drilled through the exterior wall at the agreed entry location. The fiber is threaded through and the hole is sealed around the

Solved: Full fibre installation

I got Full Fibre installed last year and drilled the hole myself, I used a 6mm Drill and that was perfect. The fibre is not terminated on one end so is just fed from the inside and then spliced in
