How much does a JDSU optical module cost

Overview

The built-in beam blocking switch provides fast access from any attenuation setting to infinite attenuation (> 90 dB).

Key Takeaways

JDSU optical modules typically range from several hundred to several thousand USD, depending on the model and condition.

Price Overview

The cost of a JDSU optical module varies widely based on the specific model, functionality, and whether it is new or used. For example: High-end modules like the JDSU ONT-506 Optical Payload Module (40/43G) are listed on eBay as used items, often priced in the hundreds to low thousands of USD, with financing options available. Specialized modules such as the JDSU/VIAVI CDWDM1E Module for wavelengths 1551/1571/1591/1611 nm are also available on eBay, with prices typically in the mid-hundreds USD range, depending on seller and condition.

End-of-life or legacy modules may be purchased from resellers like Artisan Technology Group, where pricing is provided upon request, reflecting the custom nature and limited availability of these modules.

Factors Affecting Cost

Module Type: Single-mode, multi-mode, or payload modules have different price points due to performance specifications and application requirements. Condition: New modules are generally more expensive, while used or refurbished modules can offer significant savings. Vendor and Availability: Authorized resellers, online marketplaces, and surplus equipment suppliers may offer different pricing and shipping options.

Additional Features: Modules with higher bandwidth, extended wavelength support, or advanced testing capabilities tend to cost more.

Purchasing Tips

Request a quote from resellers like Artisan Technology Group for precise pricing and availability. Check online marketplaces such as eBay for used or refurbished modules, which often include warranties or return policies. Consider compatibility with your existing test equipment, such as the JDSU T-BERD/MTS-6000 platform, to ensure the module meets your technical requirements.

In summary, expect to pay anywhere from a few hundred to several thousand USD for a JDSU optical module, with the final price depending on model, condition, and vendor.
