

How much does a cable tray cost in a cable shaft

Overview

Steel trays typically cost between \$5 to \$25 per meter. They are strong, durable, and widely available, making them ideal for general-purpose electrical installations in residential, commercial, and industrial settings. Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation. This guide breaks down everything buyers need to know, from price trends to cost-saving tips. In real EPC and industrial projects, the final installation cost depends on multiple engineering factors, including tray size, installation height, routing complexity, support spacing, labor conditions, and project environment. That number matters, but it's rarely the one that decides whether a project stays within budget.
