How much does a double-layer cable tray cost approximately

Overview

Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation.

Key Takeaways

A double-layer cable tray typically costs between $10 and $50 per meter, depending on material, type, and finish.

Material and Price Range

Steel (Hot-Dip Galvanized or Pre-Galvanized): $5–$25 per meter. Hot-dip galvanized steel is more durable and suitable for outdoor or industrial environments, while pre-galvanized is cheaper and suitable for dry indoor areas. Aluminum: $6–$30 per meter.

Lightweight and corrosion-resistant, ideal for humid or coastal environments. Stainless Steel: $20–$50 per meter. Highly durable and corrosion-resistant, used in food processing, offshore, or chemical plants.

FR

P (Fiber-Reinforced Plastic): $10–$50 per meter. Offers long-term durability in aggressive environments but is more expensive.

Factors Affecting Cost

Tray Type: Ladder trays are more expensive than perforated or wire mesh trays due to higher load capacity. Coating and Finish: Powder-coated or HDG trays increase durability but add to the price. Installation: Labor costs vary by region; double-layer trays may require additional supports and brackets, increasing installation costs.

Length and Quantity: Standard trays are 2. 4 meters long; bulk orders can reduce per-meter cost. Environmental Conditions: Outdoor, corrosive, or high-humidity areas may require more expensive materials or coatings.

Practical ConsiderationsDouble-layer trays are often used to separate power and data cables or to increase capacity. The cost is roughly double that of a single-layer tray, plus additional supports and fittings. Fittings and accessories (elbows, tees, reducers) are priced per piece and can add 10–20% to the total project cost.

Bulk purchasing and negotiating with suppliers can significantly reduce costs, especially for industrial projects. In summary, for a standard double-layer cable tray, expect $20–$100 per meter depending on material, finish, and installation complexity. For precise budgeting, consider the tray material, environmental exposure, and required fittings.
