How to connect a square fiber optic cable to a router

Overview

However, setting up a fiber optic connection to your router can seem daunting if you''re unfamiliar with the process.

Key Takeaways

Fiber optic cables with square connectors typically connect to an Optical Network Terminal (ONT) first, which then links to your router via Ethernet. Step 1: Verify Equipment CompatibilityNot all routers can accept fiber optic input directly. Check if your router has a fiber-ready port (often labeled SFP, ONT, or Fiber) or if your ISP provides an ONT to convert the optical signal to Ethernet for standard routers.

Step 2: Prepare the Fiber CableHandle the fiber cable carefully; avoid touching the glass tip. Remove any protective dust caps from both the cable and the ONT/router port. Ensure the cable is free from bends sharper than the manufacturer's minimum bend radius to prevent signal loss.

Step 3: Connect to the ONTInsert the square fiber connector into the ONT's optical input port. Align the key or tab on the connector with the port and push until it clicks securely. Power on the ONT and wait for the status lights to stabilize (usually 2–5 minutes),.

Step 4: Link the ONT to the RouterUse a high-quality Ethernet cable (Cat6a or higher) to connect the ONT's LAN/Ethernet port to the router's WAN/Internet port. Power on the router and wait for the indicator lights to confirm a successful connection. Step 5: Verify the ConnectionAccess the router's admin panel via a browser (commonly 192.

168. 1. 1) to check internet status.

Test connectivity on a device to ensure the fiber link is active.

Additional Tips

Wear gloves and safety glasses when handling fiber to avoid injury from glass shards.

Keep the ON

T and router in a dry, ventilated area near a power source. If your router supports direct fiber input, ensure the square connector matches the router's port type (e.g., SC/APC or SC/UPC) and follow the same careful insertion procedure. By following these steps, your fiber optic connection should be properly established, providing high-speed, low-latency internet throughout your network.
