Indian Fiber Optic Transceiver Connectors

Overview

Get contact details & address of companies manufacturing and supplying Optical Transceiver, Transceiver Module, Optical Module across India.

Key Takeaways

Fiber optic transceiver connectors in India include a wide range of types such as LC, SC, ST, MPO, and SFP-compatible connectors, available from multiple local suppliers and distributors.

Overview of Fiber Optic Connectors

Fiber optic connectors are devices that terminate the end of an optical fiber and allow quick connection and disconnection without splicing. They mechanically align the fiber cores to ensure efficient light transmission. Common connector types include LC, SC, ST, MPO, and MTP, each with specific ferrule designs and mating mechanisms such as bayonet, screw-on, or snap-in.

These connectors are compatible with active devices like LEDs, VCSELs, and photodiodes used in transceiver modules (Mouser India).

Transceiver Module Compatibility

Fiber optic transceiver modules, such as SFP, SFP+, QSFP, XFP, and CFP, require compatible connectors to interface with fiber cables. The connector type determines the module's data rate, wavelength, and application. Indian suppliers like element14 India and DigiKey India stock a wide range of transceiver modules with various connector options, offering datasheets, technical support, and fast delivery.

Indian Suppliers and Manufacturers

Several Indian companies manufacture and supply fiber optic connectors and transceiver modules: IndiaMART lists multiple manufacturers and exporters of fiber optic connectors across India, providing contact details and pricing. ExportersIndia.com offers a directory of suppliers, wholesalers, and retailers for optical fiber connectors at competitive prices. Mouser India provides a large inventory of connectors with datasheets, parametric filters, and technical specifications for easy selection.

Key Considerations for Selection

When choosing fiber optic transceiver connectors in India, consider: Connector type: LC, SC, ST, MPO, MTP, etc. Compatibility: Ensure the connector matches the transceiver module type (SFP, QSFP, XFP, etc.). Data rate and wavelength: Match the connector to the required transmission speed and optical wavelength.

Supplier reliability: Choose reputable Indian distributors or manufacturers for quality assurance and support. By selecting the appropriate connector type and sourcing from reliable Indian suppliers, users can ensure efficient, high-speed optical communication for networking, data centers, and telecommunication applications.
