Indoor fiber optic cable for surveillance cameras available in stock

Overview

Shop DigiKey''s large in-stock selection of Fiber Optic Cables. View inventory, pricing and order now for same day shipping!

Key Takeaways

Indoor fiber optic cables for CCTV and surveillance systems are available in various types, including tight-buffered and multimode or single-mode fibers, with immediate stock from suppliers like Mouser, EFB-Elektronik, and OPTRAL.

Key Options and Suppliers

Mouser Electronics offers a wide selection of indoor fiber optic cables suitable for structured cabling and surveillance applications, with inventory, pricing, and datasheets readily available for immediate purchase. EFB-Elektronik provides indoor fiber optic installation cables in fire protection classes from B2ca to Eca, including breakout and loose tube cables. They offer both single-mode fibers for long-distance transmission and multimode fibers for shorter distances, supporting bandwidths up to 10 Gbit/s over hundreds of meters.

Their in-stock items allow for rapid delivery, and custom solutions are available for specialized surveillance setups.

OPTRA

L specializes in fiber optic cables for CCTV and security systems. Their tight-buffered cables are compact, flexible, and designed for indoor installations, facilitating easy connector attachment. These cables support long-range, high-bandwidth transmission without splicing, are immune to electromagnetic interference, and can be integrated into perimeter control or anti-intrusion systems.

OPTRA

L also offers gel-filled multi loose tube cables with metallic armor for indoor/outdoor installations, providing additional protection for sensitive surveillance networks.

Cable Considerations for Indoor Surveillance

Fiber Type: Single-mode for long distances, multimode for shorter runs within buildings. Jacket Type: Plenum-rated for air-handling spaces, riser-rated for vertical runs, LSZH for low smoke and toxicity. Structure: Tight-buffered cables are easier to terminate and ideal for indoor CCTV networks.

Performance: High bandwidth and immunity to electromagnetic interference ensure reliable video transmission.

Summary

For indoor surveillance camera installations, you can select from ready-to-ship indoor fiber optic cables from suppliers like Mouser, EFB-Elektronik, and OPTRAL. These cables provide high performance, fire safety compliance, and ease of installation, making them suitable for both standard CCTV setups and advanced security systems. For specialized requirements, such as armored or custom-length cables, suppliers like EFB-Elektronik and OPTRAL offer rapid customization and technical support.
