Intelligent PDU Case Study

Overview

A data center infrastructure provider in the United States approached Qmax Systems to design and manufacture an intelligent, high-power rack Power Distribution Unit (PDU) for deployment across its data center facilities. The unit needed to deliver reliable 3-phase power to 30 individually metered. A leading domestic cloud service provider faced pressing challenges with its new 5,000-rack data center: the rapid expansion of high-performance servers demanded PDUs that could support ultra-high power density, while the need for 24/7 uninterrupted operation required strict safety compliance and. The Schleifenbauer PDU 5. 0 wasn't conceived in a lab, but shaped through conversations with over 40 data centre managers across Europe. Their needs and insights laid the foundation for a smart, scalable and fully customisable PDU solution — including licence-free monitoring software. This case. NVIDIA DGX systems are among the world's most powerful AI platforms. Real-time energy monitoring also helps the company.

High Power Intelligent PDU for AI Data Centers | Case Study

A data center infrastructure provider in the United States approached Qmax Systems to design and manufacture an intelligent, high-power rack Power Distribution Unit (PDU) for deployment across its

Custom PDU Case Studies | Data Center & Industrial Power

Explore PEDIU-X custom PDU case studies for data centers, mining, construction and renewables—proof of safer power, lower failures and faster deployment.

Case study PDU 5.0 en EnerTree DCEM Software

This case study explains how that collaboration resulted in a powerful, future-proof solution for today''s data centres, particularly in AI and HPC environments.

Case study Nvidia PDU

Looking for a PDU for NVIDIA DGX, BasePOD or SuperPOD? Whether you are deploying a single DGX system or building a complete AI cluster, Schleifenbauer can help design the right power distribution

Resources

Let Raritan help you learn about and plan for your next data center project. The below resources have been designed to help you get the most out of our learning as a leader in Data Center Power

Case Study

Along with the intelligent PDUs introduction at the IDC Frontier''s Kitakyushu data center in 2011, Yahoo! JAPAN also deployed a monitoring tool that constantly checks power consumption.

Data Centre PDU Migration & Rack Security | European Bank Case

When a leading European bank decided to change its intelligent PDU supplier, the challenge extended far beyond hardware replacement. Furthermore, the bank operated multiple data centre sites and

Smart PDU Development | PDU Device Design

Our task was to develop firmware for a power distribution unit (PDU) designed for remote power management and monitoring of server room equipment. The PDU device should control power

Data Center Power Distribution Units

As data centers evolve, intelligent rack PDUs are transforming from simple power outlets into critical devices that drive efficiency, sustainability, and reliability.

Technology Transformation Services & Solutions

Accenture technology transformation services help shift from legacy tech to innovation with a technology transformation strategy to drive growth. Learn more.

Gartner | Delivering Actionable, Objective Insight to

Gartner provides actionable insights, guidance, and tools that enable faster, smarter decisions and stronger performance on an organization''s mission-critical priorities.

Optimizing Residential Energy Usage with Smart Devices: A Case Study

In this study, we examined the impact of an intelligent system and air conditioning control on power consumption. The experiment was carried out during five distinct time periods: (1)

What We Think | Business & Technology Insights | Accenture

Accenture thought leadership offers business and technology insights on key market forces & technologies to set your company on the path to value.

HPE OpsRamp Software | Unified Hybrid Cloud Management

HPE OpsRamp Software Simplify hybrid cloud complexity with full visibility, AI-driven insights, and intelligent automation. Unify every system and signal across multi-vendor, multi-cloud environments

AI-Powered Customer Experiences | Verint IVA

Drive AI outcomes with higher interaction containment rates across your voice and digital channels and improved agent capacity.

From Pipelines to Agents: Self-Healing CI/CD Workflow

The Brain of the Operation: Azure OpenAI. When building a DevOps agent, following are the points which can be considered to select Azure OpenAI...

TransCelerate BioPharma: Accelerating Answers

TransCelerate BioPharma Inc. collaborates across the global biopharmaceutical research and development community to identify and design solutions to develop and deliver new medicines. Our

PwC: Audit and assurance, consulting and tax services

With bold insights, proven expertise and tech that moves business forward, we help you drive your company to the leading edge.
