Google Cloud Platform (GCP) spans 42 regions, 127 zones, and 200+ edge locations, enabling high-bandwidth, low-latency services worldwide. Specialized and Emerging ProvidersCyrusOne focuses on scalable colocation, cloud solutions, and AI-ready data centers, with operations in the US, UK, Germany, and other regions, aiming for carbon neutrality by 2030.

QT

S Data Centers provides secure, scalable colocation and connectivity solutions across the US and Europe, emphasizing customer satisfaction and sustainability. EdgeConneX develops decentralized, high-performance edge data centers to reduce latency for real-time applications like streaming and industrial IoT.

## European-

## Focused Providers

In Europe, VIRTUS, Global Switch, STACK Infrastructure, and Vantage Data Centers are notable for AI-ready, high-density, and sustainable facilities in major cities such as London, Frankfurt, Berlin, and Milan. These companies emphasize energy efficiency, liquid cooling, and ESG initiatives to support hyperscale and enterprise workloads.

## Key Services and Capabilities

Colocation: Secure rack space and power for enterprise IT infrastructure. Cloud Integration: Hybrid and multi-cloud connectivity for AI, analytics, and enterprise applications. Connectivity: Direct links to major networks, internet exchanges, and low-latency routes.

Sustainability: Green energy, carbon neutrality goals, and efficient cooling systems.

A

I and Hyperscale Support: Facilities optimized for high-density computing and AI workloads. These companies collectively form the backbone of global digital infrastructure, enabling enterprises to scale operations, maintain high availability, and leverage cloud and AI technologies efficiently.
