Invisible Integrated Distribution Box

Overview

DISBOX-G flush-mounted small distribution board IP40 DISBOX-G – the perfect choice for an almost invisible integration of the building electrics. The housi.

Key Takeaways

An Invisible Integrated Distribution Box is a compact, modular electrical enclosure designed for discreet installation while safely distributing power and signals.

Overview

An Invisible Integrated Distribution Box functions like a standard distribution box but is engineered to be concealed or seamlessly integrated into walls, furniture, or equipment enclosures. It houses essential components such as circuit breakers, fuses, bus bars, and residual current devices (RCCBs), ensuring safe and efficient power distribution without being visually obtrusive. These boxes are often used in modern residential, commercial, and industrial settings where aesthetics and space optimization are important.

Key Features

Compact and Modular Design: Many integrated boxes are modular, allowing flexible configurations and easy expansion. Components can be swapped or upgraded without major rewiring.

High-

Quality Materials: Typically made from engineering thermoplastics like polycarbonate (PC) or ABS, or coated metals, providing durability, fire resistance, and electrical insulation. Protection and Safety: Equipped with MCBs, RCCBs, isolators, and bus bars, these boxes prevent overloads, short circuits, and electrical faults while maintaining compliance with safety standards.

Space-

Saving and Concealed Installation: Designed for flush mounting or hidden placement, reducing visual clutter and optimizing interior space. Optional Smart Features: Some models include energy monitoring units, communication modules, or LED indicators for real-time monitoring and remote control. Environmental Protection: Many integrated boxes offer IP65–IP67 ratings, making them resistant to dust, water, and UV exposure, suitable for both indoor and outdoor installations.

Applications

Residential: Concealed in walls or cabinets to maintain interior aesthetics while distributing power to lighting, outlets, and appliances. Commercial and Industrial: Integrated into control panels, machinery, or modular furniture for clean, organized wiring and reliable power distribution. Automation Systems: Passive or modular distribution boxes connect sensors and actuators efficiently, reducing wiring errors and installation time.

Outdoor or Harsh Environments: Waterproof variants protect electrical connections for solar systems, pumps, or lighting installations.

Benefits

Aesthetic Integration: Maintains clean interior or equipment design. Safety and Reliability: Protects circuits and equipment from electrical faults. Flexibility: Modular design allows easy customization and expansion.

Space Efficiency: Reduces the footprint of electrical installations, ideal for compact or high-density setups. Ease of Maintenance: Integrated LEDs and modular components simplify troubleshooting and replacement. In summary, an Invisible Integrated Distribution Box combines safety, compactness, and aesthetic integration, making it ideal for modern electrical installations where both functionality and design are priorities.

DISBOX-G flush-mounted small distribution board IP40

DISBOX-G – the perfect choice for an almost invisible integration of the building electrics. The housing bases of the DISBOX-T series are provided with various pre-stampings on the back in order to insert

Distribution boxes – For modular and decentralized

Modular enclosure system for individual power distribution solutions and a broad product range for signal distribution. Available in all forms and configurations,

Hybrid Cable Lexium 62 ILM distribution box D0 to distribution box or ...

Schneider Electric India. VW3E1151R030 - Hybrid Cable Lexium 62 ILM distribution box D0 to distribution box or ILM integrated drives D0, UL, 3m.

Integrated distribution box, integrated distribution

Space saving: Integrating many electrical components into one box reduces the space required for laying wires and installing electrical equipment in a dispersed

PASSIVE DISTRIBUTION BOXES

Fewer terminal blocks, fewer cable entry systems, and fewer terminal boxes in the field are distribution box solutions that save space and also offer flexible mounting options.

Electrical Distribution Boxes for Power Distribution

These Distribution Boxes enable decentralized installation of the electronics close to the load. The range of applications extends from pure energy distribution in

Intelligent distribution box-Product Center-Hangyue Intelligent

Intelligent distribution box Hangyue Intelligent Smart distribution boxes are an indispensable part of modern buildings and facilities, providing efficient and safe power supply for various applications.

Distribution Boxes and Distribution Panels—The “Invisible Heart” of ...

Behind every high-rise building, every factory, and every data center lies a “heart” that quietly safeguards electrical safety—distribution boxes and distribution panels.

ABB I Sub distribution boards

Depending on your specific application, our range of sub distribution boards includes solutions with mounting plates and DIN-rails with generous wiring space on both sides and behind the DIN rails.

Custom Copper Busbar Cabinets & Control Boxes: Integrated Power ...

Discover how E-abel designs custom copper busbar cabinets and control boxes as an integrated power distribution control system. Learn how this synergistic solution improves thermal

Analysis and Improvement of Intelligent Low-voltage Integrated Power ...

In view of the problem that the door of the low-voltage power distribution box is opened for no reason under the premise that the intelligent terminal has been installed in Power Internet of Things, an

Intelligent Integrated Distribution Box

JP series integrated intelligent distribution box is a new type of outdoor integrated distribution device integrating multiple functions such as power distribution,

DISBOX-G flush-mounted small distribution board IP40

The design of the front section was deliberately made extremely flat in order to be able to integrate the flush-mounted distributor seamlessly. The installation depth of the wall box is only 87mm and the

Distribution boxes – For modular and decentralised solutions

Modern automation solutions are becoming increasingly decentralised. As a result, you need distribution systems that can be easily integrated into the common automation systems and are more efficient to

Products

Explore Products + Why choose coalesce? Centralized Cabling Coalesce acts as an integrated distribution box for structured cabling of Data, Voice, and Video

Eaton XBoard Distribution Box

The Power of Eaton Eaton''s power distribution systems are designed to be as compact and energy efficient as possible while easy access for installation, operation and maintenance. Medium and Low

HVAC Diffusers | Vent Covers, Registers, Grilles

Invi Air, manufacturer of HVAC diffusers, frameless vent covers. Offering architectural standard or custom-made linear, square and round diffusers.

Products / Distribution box

Distribution box The precision power distribution cabinet is an intelligent power distribution cabinet that comprehensively collects all energy data for the energy
