Ireland Micro-Module Intelligent Installation Solution

Overview

To meet Pure DC''s needs, AVK developed a bespoke microgrid solution that includes three independent energy buildings, which together form a fully integrated energy centre solution.

Key Takeaways

Ireland offers advanced micro-module intelligent installation solutions through KNX smart home systems, modular wiring, and prefabricated electrical solutions for residential, commercial, and industrial projects.

KNX Smart Home and Intelligent Building Solutions

Intelect is a leading provider of KNX-based smart home and intelligent building solutions in Ireland and the UK. Their systems integrate lighting, heating, and building automation into a single intelligent platform, allowing homeowners and businesses to automate and simplify their environments. Intelect provides tailored solutions for both residential upgrades and full-scale commercial automation projects, offering design, installation, and ongoing support.

They are recognized as Ireland's first official 5-star KNX Partner, highlighting their technical expertise and customer satisfaction in smart building technology.

Modular and Prefabricated Electrical Systems

Companies like Modula and Solutions.ie specialize in modular wiring and prefabricated electrical solutions. These systems are pre-assembled and tested in controlled environments, ensuring plug-and-play installation, reduced on-site errors, and faster project completion. Modular solutions allow parallel construction processes, saving time and minimizing waste.

Modula emphasizes early collaboration in the pre-construction phase to design for modularity, optimize installation efficiency, and maintain consistent quality across projects. Solutions.ie offers intelligent, scalable, and modular DALI lighting control systems, underfloor wiring, and prefabricated electrical networks suitable for complex infrastructure, commercial facilities, and industrial sites.

Benefits of Micro-

Module Intelligent Installations

Time Efficiency: Off-site assembly and pre-testing reduce installation time on-site. Quality and Reliability: Controlled manufacturing ensures consistent standards and error-free modules. Scalability: Modular systems can be expanded or adapted to future needs.

Energy Optimization: Intelligent control systems manage lighting, heating, and energy use efficiently. Reduced Labor and Costs: Prefabrication minimizes on-site labor and potential rework.

Applications

These solutions are suitable for: Residential Smart Homes: Automated lighting, heating, and security systems. Commercial Buildings: Integrated building management for offices, retail, and hospitality.

Industrial and Mission-

Critical Facilities: Data centers, manufacturing plants, and infrastructure projects requiring reliable, scalable electrical and automation systems. By combining KNX smart home technology with modular and prefabricated electrical systems, Ireland's micro-module intelligent installation solutions provide a future-proof, efficient, and high-quality approach to modern building automation and electrical infrastructure.

Europe''s First Microgrid: Pure DC in Dublin, Ireland

To meet Pure DC''s needs, AVK developed a bespoke microgrid solution that includes three independent energy buildings, which together form a fully integrated energy centre solution.

Home | Local Power

“Our promise is to advise our customers wisely in helping them reduce their energy costs and deliver commercially smart solar power solutions for their business, farm or home.”

EcoStruxure™ Modular Data Centre | Schneider Electric Ireland

Deploy the compute capacity you need — where you need it — with factory-built quality, faster installation, and predictable performance. Modular data centres deliver adaptable, high-performance

Solutions

From high-voltage electrical systems and modular, prefabricated solutions to advanced building automation and EV infrastructure, we design and deliver systems that maximise efficiency, drive

Microgrids | Schneider Electric Ireland

Schneider Electric offers a ready-to-use solution to help you design a microgrid, regardless of the application. Our pre-engineered microgrid control centres have all the components you need for

Smart Micro-grid Solutions | FusionSolar Ireland

Our microgrid solutions are designed to provide reliable, secure, and sustainable power to remote or off-grid communities, industrial sites, and other critical facilities.

Ireland Sustainable Energy Solution with smart micro inverter

The introduction of the hybrid micro inverter began to bridge the gap, allowing users to integrate battery storage directly with module-level conversion to stabilize the volatile Irish grid.

Fuinneamh Wind Power

We supply both wind and solar energy and electrical solutions tailored specifically to your needs based on your back yard resources. Our services include UPS (Uninterrupted Power Supply), Micro Grid
