L-shaped brackets in network cabinets

Overview

An L bracket, also known as an angle bracket or corner brace, is a simple, L-shaped component used extensively in cabinetry and construction to connect two pieces, usually at a 90-degree angle. These components are typically made from metal or plastic and feature pre-drilled holes. ICC's new L Bracket cable management panel is designed to mount to any standard EIA-compliant hole spacing for custom vertical and horizontal cable management and includes #12-24 mounting screws. For custom vertical and horizontal. The L-shaped bracket is made of thickened 2. 0 coldrolled steel plate, which can bear a weight of over 90kg and can support heavy equipment. 90°bending, thickened material, arc corner. The L-shaped bracket is mainly used inside the cabinet, responsible for supporting heavy equipment. The profiles or supports in L of Aiten Data are presented in three length measures: 450 mm, 600 mm, 800 mm and 1000 mm. They are adjustable for easy installation. Our L Brackets are fitted into the racking using M6 Cage Nuts which need to be purchased separately.
