Latest prices for China Unicom optical cables

Overview

Buy In Bulk Unicom Cable Various Lengths Available | Alibaba.comExplore high-quality China Unicom fiber optic and network cables for reliable connectivity.

Key Takeaways

China Unicom optical cable prices vary widely, typically ranging from a few dollars per meter for low-core indoor cables to higher costs for high-core outdoor or armored cables, with exact pricing often negotiable. Price OverviewLow-core cables (4–24 fibers): These are commonly used for indoor or FTTH applications. Prices can start at around $1–$3 per meter, depending on fiber quality and jacket material (PE, PVC, LSZH).

Medium-core cables (48–96 fibers): Often used for LAN or small-scale outdoor deployments. Prices increase due to higher fiber count and manufacturing complexity, typically $3–$6 per meter. High-core cables (240 fibers or more): Used for backbone or trunk lines in access networks.

These are more expensive due to intensive fiber ribbon construction and space-saving design, with prices negotiable and often quoted per project.

Factors Affecting Cost

Fiber Count: Higher fiber counts increase cost, but not linearly, as manufacturing processes for ribbon cables are efficient. Fiber Brand and Quality: Premium fibers (e.g., Corning, YOFC, FiberHome) cost more but offer lower attenuation and longer lifespan, while local Chinese brands are cheaper. Cable Type: Outdoor, armored, or aerial cables are more expensive than indoor drop cables due to durability and environmental protection.

Bulk Orders: Large orders can reduce per-meter cost, and suppliers often provide discounts for factory-direct purchases. Customization: Custom lengths, jacket materials, or special specifications can affect pricing.

Procurement Tips

Contact suppliers directly for negotiable quotes, as prices fluctuate with raw material costs (glass fiber, copper, PE jackets). Request samples to verify quality before bulk purchase.

Consider OE

M or factory-direct sourcing to reduce costs for large-scale projects. In summary, while a general cost range can be provided, the final price of China Unicom optical cables depends on fiber count, type, quality, and order volume, and is best obtained through direct supplier negotiation.
