Lc flexible optical cable

Overview

L-com's Flex-Boot Single Mode LC assemblies are designed to fit in tight spaces and in applications where a non-standard angle of connection is required. These fiber optic patch cables are built using bend insensitive fiber and feature OFNR (Riser rated) jackets along with LC style connectors. LC (Lucent Connector) is the world's dominant duplex optical interface, used across enterprise networks, telecom infrastructure, and especially data centers. Even as 400G/800G parallel-optics and MPO-based high-density solutions grow, LC remains essential for 10G/25G/50G/100G/200G/400G duplex. The SimpleGrip is tough, easy to use, and helps protect optical cables that can be easily damaged during installation. Equipped with a stainless steel swivel end that minimizes cable twisting, mesh netting for connector protection and includes electrical tape. It covers LC connectors, LC patch cables, uniboot designs, armored. HeyOptics offers Flexible boots, uniboot, mini boot, switchable uniboot for LC, SC, ST, FC, LSH (E2000) and MPO connector in any lengths 0. 1m to 100m available with OM3, OM3, SMF fiber.
