Luxshare Optical Module Recommendation

Overview

Optical Interconnect Products and Solutions Our portfolio includes DPO (fully retimed), low-power LRO (Linear-Receive Optics), and LPO (Linear-drive Plugga.

Key Takeaways

For high-performance AI, cloud, and data center applications, Luxshare's 400G, 800G, and 1. 6T optical modules, including DPO, LRO, and LPO variants, are recommended for their low power, high bandwidth, and scalable deployment. Recommended Luxshare Optical Modules1.

1. 6T OSFP DR8 TransceiversBuilt on silicon photonics, offering high-bandwidth connectivity with low power per bit. Ideal for machine learning clusters, HPC, and hyperscale data centers.

Supports scalable, low-latency networking infrastructure and sustainability goals. 2. 800G OSFP ModulesAvailable in DPO (Digital/Retimed), LRO (Linear-Receive Optics), and LPO (Linear Pluggable Optics) variants.

Designed for robust integration into AI and cloud networks. Demonstrated excellent pre-FEC BER performance and system-level validation. 3.

400G QSFP ModulesVariants include VR4, DR4, FR4, and LRO. Flexible reach options, low-power operation, and advanced LRO support.

Suitable for Ethernet and Infini

Band server connectivity in AI and cloud environments. 4. Active Optical Cables (AOCs)Range: 100G–800G, pre-matched optics and fiber for reliable performance.

Thin, lightweight fiber profile optimizes airflow and cable management in high-density racks. Factory-matched assemblies simplify qualification and deployment. 5.

POET Optical Engine Integration

Luxshare modules now integrate POET transmit and receive optical engines for 400G and 800G single-mode fiber applications. Combines 100G/lane and 200G/lane optical engines with Luxshare's advanced module designs. Enhances energy efficiency and performance for AI network equipment.

Selection Guidance

For A

I and HPC workloads: Prioritize 1. 6T OSFP DR8 or 800G OSFP LRO/DPO modules for maximum bandwidth and low power. For standard data center interconnects: 400G QSFP modules provide flexible reach and low-power operation.

For simplified deployment and high-density racks: Use pre-matched AOCs to reduce installation complexity and improve airflow. For cutting-edge AI networks: Consider modules with POET optical engines for enhanced performance and energy efficiency. Luxshare optical modules are engineered to meet high reliability, low maintenance, and scalable performance requirements, making them suitable for modern data centers, cloud platforms, and AI/GPU environments.

CPO-Luxshare

CPO Co-package optical solution 3.2T CPO Module Adopting silicon optical co-packaging technology, it has lower power consumption and supports 3.2 t transmission rate

Luxshare Optical Module Recommendation

ABC Stimulo Photonics designs and manufactures fiber optic cables, optical transceivers, ODF frames, data center cabling solutions, MPO/MTP components, and FTTH equipment for telecom, data

Luxshare targets CPC, Foxconn enters CPO

Foxconn recently announced its entry into the optical module and CPO markets. Its 800G optical module is expected to complete customer sample testing and secure its first mass production

Luxshare-Tech Showcases Full-Stack 1.6T and 800G Interconnects

Among the key highlights is Luxshare-Tech''s 1.6T OSFP DR8 optical transceiver built on silicon photonics. This module delivers high-bandwidth connectivity with low power consumption per

POET, and Luxshare Tech jointly target AI opportunities

Luxshare Tech and POET agreed to produce additional types of optical transceiver modules. These modules showed exceptional performance, which prompted Luxshare Tech and POET to adopt a...

Luxshare Nears Hong Kong IPO After AI Module Push

Luxshare has pushed into optical modules, copper interconnects, thermal management and power management, including stable mass production of 800G silicon photonic modules and

Luxshare-TECH Preview for OFC 2024: Optical Interconnect Products ...

400G QSFP-DD DR4 DPO and 800G OSFP DR8 DPO optical modules: These modules are specifically designed for Intel''s Gaudi AI servers, delivering high-speed data transmission with

Optical Interconnect Products and Solutions

Luxshare-Tech optical interconnect products and solutions meet the high reliability, low power, low maintenance and high performance needs of data centers.
