MPO Fiber Optic Patch Cord 400g

Overview

This OM5 MPO patch cable is optimized for 400G Ethernet (SR8, SR4. 2, and BiDi) and high-density data center applications, offering backward compatibility with 40G/100G networks. □□ Why OM5 for 400G?

✔ Supports Short-Wavelength Division Multiplexing (SWDM) – Enables 4x more. While high-fiber-count trunk cables form the massive backbone of modern data centers, the performance of the entire network ultimately hinges on the final few meters: the MPO / MTP® patch cord. Also known as equipment cords or jumpers, these specialized, multi-fiber assemblies bridge the gap. MPO patch cables are the foundation of modern high-speed data center cabling. ✔. FS offers full range of premium MTP®/MPO fibre optic cable assemblies for 40G/100G/400G high density cablings that feature corning clearcurve fibres and BIF fibre design. They are engineered for 40G/100G/200G/400G configurations. This category includes MTP®/MPO Single mode, OM3, OM4, and OM5 trunk cables. And we offer 8, 12. Executive Summary: As 40G, 100G, and 400G parallel optics become the backbone of hyperscale and AI data center fabrics, the MPO (Multi-Fiber Push-On) connector has evolved from a niche telecom interface into the most critical multi-fiber interconnect in structured cabling.
